SYNTHETIX / PRODUCT TEST REPORT

RefillHK · v1

Run run-20261017-195303-6987 | Mode: interactive

Value proposition: Household cleaning-product refills in reusable bottles

Objective: Measure the actual engine path

Synthetic results are early signals. Validate important findings with real users.

Interactive evaluation records attempted browser tasks. A task completes only when its coded success check passes.

Report quality note: Recorded browser evidence: 2026-10-17 19:53 HKT. New feedback: 2026-10-18T01:09:00.432493+08:00; provider: DeepSeek; model: deepseek-flash.

Report quality note: This export re-evaluates the same recorded persona and task evidence, supplemented by assistant transcriptions of saved screenshots. No new browser visits were made. All original run IDs, user IDs, task outcomes and success checks are retained; the original database evaluation is unchanged.

Report quality note: Browser failures can reflect agent capability as well as product friction. The new feedback cannot establish that a recorded failure was caused by the product. One synthetic user does not establish demand, comparative improvement or tested capacity at larger counts.

Test coverage

Requested: 1. Completed: 1. Failed: 0. Cancelled: 0. Queued: 0. Running: 0.

Accounting check: passed

Audience: Authored benchmark profiles, not representative market data (spec engine-benchmark-1).

Individual feedback only: one requested or completed synthetic user; no population shares are shown.

Product experience

T1: Find the monthly price of the Basic plan

Success check: text_visible:HK$268 per month

Evidence run-20261017-195303-6987-u00001:T1 — failed: step limit reached

Step 1: click; target: How it works; URL: http://127.0.0.1:8101/. Find the monthly price of the Basic plan

Step 2: click; target: Delivery areas; URL: http://127.0.0.1:8101/faq.html. Find the monthly price of the Basic plan requires selecting the 'Basic' plan from the options.

Step 14: click; target: Delivery areas; URL: http://127.0.0.1:8101/delivery.html. Navigate to the section that displays the monthly price of the Basic plan.

Step 15: click; target: Delivery areas; URL: http://127.0.0.1:8101/delivery.html. Navigate to the section with the delivery areas and find the Basic plan pricing.

T2: Check whether RefillHK delivers to Kwun Tong

Success check: text_visible:Kwun Tong

Evidence run-20261017-195303-6987-u00001:T2 — completed: success check passed

Step 1: click; target: Delivery areas; URL: http://127.0.0.1:8101/. Check if Kwun Tong is a valid delivery area.

T3: Start the free trial using the test details provided

Success check: url_contains:/welcome.html

Evidence run-20261017-195303-6987-u00001:T3 — failed: step limit reached

Step 1: click; target: Start free trial; URL: http://127.0.0.1:8101/. Start the free trial with the provided test details.

Step 2: type; target: Full name *; URL: http://127.0.0.1:8101/signup.html. Proceed to the next step in the free trial signup process using the provided test details.

Step 14: type; target: Contact phone *; URL: http://127.0.0.1:8101/signup.html. Proceed with the test details for the free trial signup.

Step 15: type; target: Contact phone *; URL: http://127.0.0.1:8101/signup.html. Proceed with the test details by filling in the contact phone field.

Rating dashboard

Individual: run-20261017-195303-6987-u00001

Appeal: 3 of 5

Usefulness: 3 of 5

Ease Of Use: 2 of 5

Trust: 2 of 5

Intention To Use: 2 of 5

Rating reasons: Appeal is mixed: reusable cleaning-product refills match a household use case, and the pages reachable in the traces cover delivery coverage and a signup form with household-relevant fields, but little product or brand detail was visible. Usefulness is mixed: the Kwun Tong delivery check succeeded (T2 completed), and the signup form covers region, building, household size and preferred refill scent, but the Basic plan monthly price was never found (T1 failed at the step limit) and the free-trial path did not reach the welcome page (T3 failed at the step limit). Ease of use is low: T1 looped on the Delivery areas page with no price evidence until the step limit, and T3 repeated typing into the contact-phone field with the Email field still recorded empty at the final observed step, so the flow was not completed within the trace. Trust is low: the reviewed material explicitly describes an invented service concept and a static demonstration that registers nothing, and no literal price evidence was supplied anywhere in the traces. Intention to use is low: the refill concept is relevant, but with moderate price sensitivity the missing plan pricing and the uncompleted trial path limit hypothetical interest in trying it.

Strengths: Reusable cleaning-product refills fit the household segment's routine needs.; Delivery coverage for Kwun Tong was visible and the delivery-area check (T2) completed.; The signup form includes practical household fields: region, building name, flat and floor, household size, preferred refill scent, and delivery notes.; The demonstration openly discloses that it is static and that nothing is registered or transmitted.

Problems: [major] The Basic plan monthly price was not visible on the pages reached; the trace stayed on the Delivery areas page with no prices recorded and ended at the step limit.

Suggestions: Surface the Basic plan monthly price in a clearly labeled plans or pricing area instead of requiring navigation through FAQ and Delivery areas.; Reduce free-trial form friction by making required fields and the next action obvious, since the final observed signup state still had an empty Email field.; Show visible plan details and service terms so a price-sensitive household can judge the offer before starting a trial.

Market attractiveness

Read the individual's appeal and intention-to-use ratings above. One simulated response does not establish a market pattern.

Segment results are unweighted synthetic signals; they do not measure conversion or predict demand.

Improvement backlog

No grouped findings have been generated. Individual feedback and task evidence remain available.

Next validation

Suggestion — Validate with real users: observe core tasks and ask participants to explain their decisions.
